

History of MRW Systems

MRW Systems is managed security and IT service provider (MSSP & MSP). Since 1997, we have been servicing small and mid-size businesses across the Mid-Atlantic, from Maryland, Virginia, Pennsylvania to Washington DC.

Our mission at MRW Systems is to empower our clients to move their business forward through the correct utilization of technology. And we do just that through our Managed IT service.

MRW Systems has always emphasized cybersecurity awareness and protection through our managed service contracts from the beginning. However, with the rise in cyber threats, we felt responsible to do more.

In 2017, we developed NetGarde, our cybersecurity service. NetGarde offers enterprise-level cybersecurity solutions for SMBs.

In addition to our managed services, we also offer compliance solutions, cloud services, desktop as a service (DAAS), backup and recovery services, Microsoft Office 365, VoIP phone systems.

Michael Wolinski Bio

Driven by his passion for Technology, Michael Wolinski founded MRW Systems, a Maryland IT company, in 1997 after spending over a decade in Corporate IT Departments and as CIO of several companies.

Every day he brings his knowledge and enthusiasm to his clients and his staff in pursuit of his dream of being a great IT company.

In the cybersecurity front, Michael is a Certified Information Systems Security Professional (CISSP), a Certified Ethical Hacker (CEH), and a CMMC registered practitioner.
